**Note:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide a reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

**Caution:** Danger of explosion if lithium battery is incorrectly replaced. Replace battery only with the same or equivalent type recommended by the manufacturer. Dispose of used batteries according to the manufacturer's instructions.

### **INTRODUCTION**

Congratulations on your choice of the LinkPoint 3000 point-of-sale (POS) terminal. The LinkPoint 3000 is ideal for the retail needs of you and your merchants. Scientifically engineered to exceed the quality found in current terminal technology, the LinkPoint 3000 combines user-friendly operation with soft programmable functions. The screen addressable keys and an innovative backlit display make the terminal operation quick and easy. With expanded serial ports, the LinkPoint 3000 is compatible with all major printers. The terminal also contains additional serial ports for PINpads, check readers, and other peripherals.

**Figure 1**

This manual includes step-by-step guides through specific transactions and operations, and shows how to keep the terminal in peak operating condition. Words that appear in capital letters and brackets, [LIKE THIS], stand for keys on the terminal keypad. Words that appear in capital letters without brackets, LIKE THIS, stand for display messages.

#### ***Printers***

The LinkPoint 3000 terminal supports all major terminal printers. The terminal is compatible with: LinkPoint's PrintPoint 1000, PrintPoint 3000, VeriFone's P250, P900, PrintPak350, and Citizen's iDP3530 and iDP562 printers. Printers attach easily to the LinkPoint 3000 terminal with a connecting cable. If a merchant does not use an electronic printer, a manual imprinter is normally provided to produce transaction records for both the merchant and the customer.

#### ***PINpad Devices***

The LFRET43 Retail/AVS/Purchasing Card application programmed in the LinkPoint 3000 terminal supports VFI PINpads 101, 1000, 201, and 2000 for Debit transactions. PINpads attach easily to the PINpad connector on the back of the terminal (please refer to the PINpad manual for installation and operating instructions). The Master/Session encryption method is supported.

## ***GETTING STARTED***

---

### **GETTING STARTED**

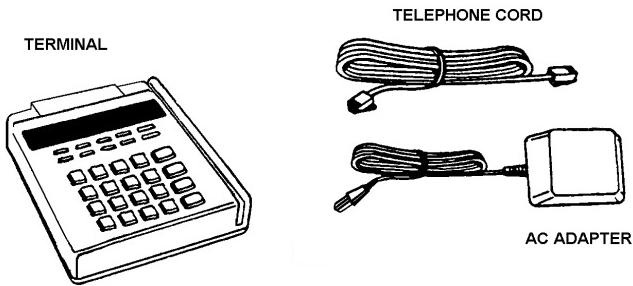

#### ***Unpacking***

Carefully inspect the shipping carton and its contents for any damage that may have occurred during shipping. If the terminal is damaged, file a claim immediately with the shipping company or carrier and notify LinkPoint International.

#### **Do not try to use a damaged terminal!**

To unpack the LinkPoint 3000:

1. With the shipping carton right side up, open the carton's lid.
2. Lift the terminal, its AC adapter and line cord with modular plugs up and out of the box.
3. Remove the terminal from its protective bubble wrap and place the bubble wrap back in the shipping carton. Remove the AC adapter from its protective box and return the box to the shipping carton. Close the shipping carton and save the shipping materials so that the unit can be repacked for shipping or moving in the future.
4. Place the terminal on a desk or tabletop. When choosing a place for the LinkPoint 3000 terminal, avoid areas with:
  - ◆ Direct sunlight or objects that radiate heat
  - ◆ Excessive dust
  - ◆ Electrical devices that cause excessive voltage variations such as air conditioners, space heaters, fans, or high-frequency security devices

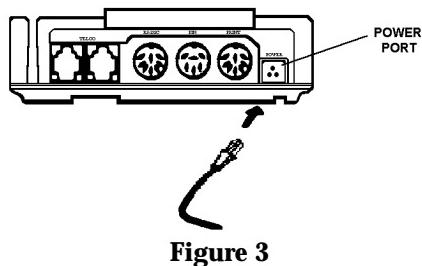

Shipping Carton Contents

**Figure 2**

### ***Installation***

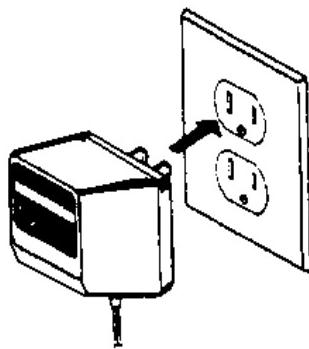

Installing the LinkPoint 3000 terminal is simple and requires no tools.

1. Connect the AC adapter's triangular end to the power input at the rear of the LinkPoint 3000 terminal (Figure 3).

**Figure 3**

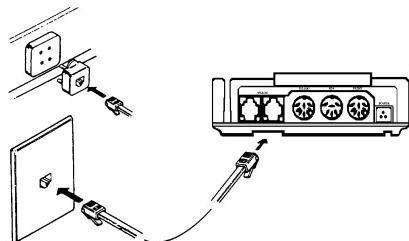

2. Plug the adapter into a 120V electrical outlet (Figure 4) or into a quality surge suppressor.

**Figure 4**

3. Insert one end of the telephone line cord into one of the modular jacks at the rear of the terminal. Insert the other end of the line cord into a modular telephone wall jack, just as one would connect a telephone (See Figure 5). The modular plug may be inserted directly into the wall jack, or use a 4-prong adapter (not included) for older 4-prong jacks.

**Note:** A standard telephone may be connected to the other modular jack at the rear of the terminal.

**Figure 5**

4. If the PrintPoint 1000, PrintPoint 3000, VeriFone P250, P900, PrintPak350, and Citizen iDP562 and iDP3530 or other compatible printer is used with the LinkPoint 3000 terminal, please refer to the manual packaged with the printer for installation and operating instructions.
5. When the terminal is plugged in, it will display the message APP. NOT AVAILABLE (unless an application is pre-downloaded).

## ***GETTING STARTED***

---

### ***Maintenance***

The LinkPoint 3000 system does not need preventive maintenance. However, LinkPoint International does recommend periodic cleaning of the keypad, using a soft brush to remove any dust. Because the terminal can be damaged by liquids, do not spray liquid cleaners directly on the terminal. Always apply the cleaner to the cloth before cleaning the terminal. To avoid costly downtime, LinkPoint International also recommends using a surge protector with the AC adapter whenever possible.

### ***Returning the Terminal for Service***

LinkPoint International has both warranty and non-warranty LinkPoint 3000 services. Refer to your sales agreement for specific details on coverage. Contact LinkPoint International to either repair or replace the LinkPoint 3000 terminal.

**TERMINAL FEATURES*****Software Features***

The LinkPoint 3000 LFRET43 retail application includes:

- ◆ An item review feature with the capability of reviewing all transaction details, including the actual date and time of each transaction
- ◆ The ability to view the terminal's totals by card type or individual transaction details by item number
- ◆ The numbering of all captured transactions for easy review
- ◆ A READY message on line 1 of the display that tracks the number of transactions available in the current batch
- ◆ Six custom header lines for receipts and reports, as well as three flexible customer agreement lines and two trailer message lines
- ◆ Easy-to-read descriptions of the transaction details, displayed through item review, detail, or summary reports
- ◆ Address Verification Service (AVS) availability compliant with Direct Marketing interchange programs
- ◆ Customized display message on line 1 and/or line 2
- ◆ Operator Identification (up to four-digits) for employees who operate the terminal
- ◆ Pre-print function that prints after the user slides the card or manually enters the card number information.
- ◆ Pre-print does not include the cardholder information for confidentiality purposes—such information prints only when a transaction is accepted or approved.
- ◆ The ability to view and enter Dial Prefix or Dial Suffix from the terminal keypad.
- ◆ The ability to read both track 1 and track 2 card data which allows printing of the cardholder's name under the signature line on credit card receipts. This feature also enables the terminal to accept ATM/Debit cards.
- ◆ Added PINpad 201 capability, configured through the download.
- ◆ CASHBACK and tiered TRANSACTION FEE options available with ATM/Debit processing.
- ◆ Debit card receipt reprinting.
- ◆ Special instructional reminders on the display and on the receipts.
- ◆ Compatibility with PrintPoint 1000, PrintPoint 3000 VeriFone's P250, PrintPak 350, P900 and Citizen's iDP 562 and iDP 3530.

## ***TERMINAL FEATURES***

---

- ◆ A summary report that prints separate bankcard, credit card, ATM/Debit, and check processing transactions.
- ◆ Batch Summary Report printing or subtotal displays for each card type.
- ◆ A view-only capability of Merchant ID, Device ID, and credit card host phone number.
- ◆ Added capability to change the Device ID (when the batch is closed or cleared) and the host telephone number.
- ◆ Fraud control features (i.e., required entry of the last four digits of a credit card and AVS).
- ◆ Password protect feature.
- ◆ Double entry requirement to confirm amounts entered for \$1,000.00 or greater.
- ◆ Calculator functions.
- ◆ Telecheck and Equifax check warranty services.
- ◆ Purchasing Card acceptance capability that is compliant with level 2 requirements.
- ◆ Function to display the last response sent from the host to the terminal, i.e. AUTH/TKT XXXXXX, DECLINED, etc.
- ◆ The ability to process 500 transactions in one batch.
- ◆ Special Dial String Codes to enable the terminal to dial out under special circumstances such as many terminals on one phone line or multiple phone line systems.

### ***Hardware Features***

The most important hardware components of the LinkPoint 3000 terminal are the display panel, the cardreader and the keypad. Their features are detailed below in the description of each component.

#### ***The Display Panel***

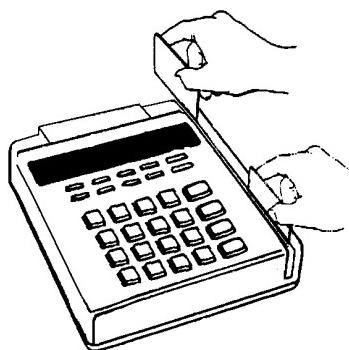

Each LinkPoint 3000 terminal has a built-in display panel capable of displaying up to 20 letters or numbers (See Figure 8). The backlit characters and plastic screen enhance readability while reducing glare. The 20-character, two-line display easily accommodates most display messages. The LinkPoint 3000 terminal also supports a scrolling feature that allows users to read messages longer than 20 characters.

**Figure 8**

#### ***The Cardreader***

The LinkPoint 3000 terminal comes with a Dual Track magnetic cardreader, so the terminal can read both track 1 and track 2. The cardreader reads the cardholder's account number, expiration date, name (track 1 only) and security data from the magnetic stripe on the back of all major credit and bankcards.

**Figure 9**

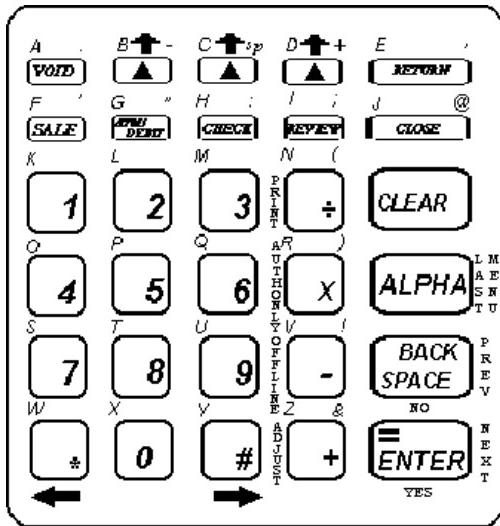

**Note:** When sliding the card (bidirectional), face the magnetic stripe down and *away* from the keypad.

## ***TERMINAL FEATURES***

---

### ***The Keypad and Key Functions***

Transactions are performed via the terminal's keypad (See Figure 10). The keypad allows users to select transaction types and information. The three green arrow keys are an updated feature on the LinkPoint 3000. This change assists both the merchant and the Help Desk when processing transactions, printing reports and troubleshooting.

LinkPoint 3000 Terminal Keypad

**Figure 10**

As Figure 10 illustrates, the LinkPoint 3000 terminal keypad has 30 keys that can be used to select numbers or letters, choose functions, or enter data. During transactions, the number keys and the "soft" [ $\blacktriangle$ ] keys are used to respond to prompts or to enter alphanumeric data.

### ***Entering Alphanumeric Data from the Keypad***

The LinkPoint 3000 keypad has 30 keys that can be used to enter as many as 47 different alphanumeric characters (please see chart on next page). To enter numbers and special characters (i.e., +) simply press the appropriate key. Alpha characters can be entered in one of two modes: single or locked. The "single" mode is selected by pressing the [ALPHA] key once followed by the corresponding character key. For example, to enter the letter "A" press [ALPHA] [A]. The "locked" mode is selected by pressing the [ALPHA] key twice followed by the corresponding character keys. For example, to enter the word "LINKPOINT" press [ALPHA] [ALPHA] [L] [I] [N] [K] [P] [O] [I] [N] [T]. To release the "locked" upper case mode, press the [ALPHA] key once.

### **BOOT MODE FUNCTIONS**

The LinkPoint 3000 boot mode allows access to certain Operating System, Hardware, and Diagnostic functions, including: date and time setup, terminal diagnostics, clear memory (application and data), port setup, and application download. Application download procedures are covered in detail beginning on page 23. This section explains how to:

1. Set the correct date and time
  2. Use terminal diagnostics
  3. Setup ports
  4. Erase the RAM
- ✓ If the LP3000 displays APP. NOT AVAILABLE on line 1 of the screen and TIME LOAD SETUP on line 2, it is already in boot mode. When in boot mode with an application already loaded, line 1 displays CLEAR TO RESUME, while the display on line 2 is also TIME LOAD SETUP.

#### ***Boot Mode Passwords***

- If an application is already downloaded into the LinkPoint 3000 terminal (i.e. display reads READY XXX), the procedure to gain access to the boot mode is: **hold down [ALPHA], press [7] [1] [3] [9] and release [ALPHA]**.
- While in the boot mode, if the LinkPoint 3000 terminal prompts for password entry, key in the password: **[4] [6] [5] [1] [0] [7] [0] and press [ENTER]**.

#### ***Cold Boot***

The cold boot feature can be used to clear the terminal's memory (RAM). This feature should always be used under the guidance of a qualified service representative, and should only be done to clear a corrupted application or to perform download tests. To access this feature, with the terminal's power off, hold down the [CLEAR] key and plug in the power cord:

#### **Display Message**

#### **Operator Action**

Enter password:
[▲] [▲] [▲]

Key in the default password of [4] [6] [5] [1] [0] [7] [0] or the password assigned by the bank/ISO or FDMS Help Desk and press [ENTER].

CLEAR to cold start Any other to resume
[▲] [▲] [▲]

Press the [CLEAR] key to erase the memory (RAM) or any other key to reboot the terminal.

LP-3000,3.X,MMDDYY Select Test Number
[▲] [▲] [▲]

Press the [\*] key to reset the terminal to the "App Not Available" display.

## **BOOT MODE FUNCTIONS**

---

### **Date and Time Setup**

To set the correct date and time follow the procedures outlined below.

<b>Display Message</b>	<b>Operator Action</b>
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>READY XXX JAN-04-98 SUN 10:30P</p><p>[▲] [▲] [▲]</p></div>	Hold down the [ALPHA] key and press [7] [1] [3] [9]. Release the [ALPHA] key to enter the boot mode.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>CLEAR to resume Time Load Setup</p><p>[▲] [▲] [▲]</p></div>	Press the left [▲] key to select TIME.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>01/04/98 10:30:41 Date Time</p><p>[▲] [▲] [▲]</p></div>	Press the left [▲] key to select DATE.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>Enter password:</p><p>[▲] [▲] [▲]</p></div>	Key in the default password of [4] [6] [5] [1] [0] [7] [0] or the password assigned by the bank/ISO or FDMS Help Desk and press [ENTER].
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>Enter new date MM/DD/YY</p><p>[▲] [▲] [▲]</p></div>	Key in the correct date and press [ENTER].
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>01/04/99 10:30:41 Date Time</p><p>[▲] [▲] [▲]</p></div>	Press the right [▲] key to select TIME.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>Enter new time HH:MM</p><p>[▲] [▲] [▲]</p></div>	Key in the correct time using 24-hour format (3:30p.m.=15:30) and press [ENTER].
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>01/04/99 12:00:01 Date Time</p><p>[▲] [▲] [▲]</p></div>	Press [CLEAR] twice to reboot terminal and return to the Ready prompt.

### **Printer Port Setup**

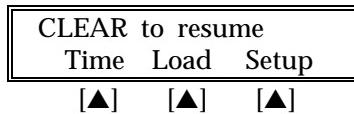

To change the printer port factory defaults follow the steps outlined below. The default settings are compatible for use with most LinkPoint, VeriFone, and Citizen printers. **There is usually no need to change these settings.** Standard Default: Baud= 9600, Parity= Even.

#### **Display Message**

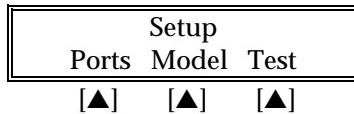

#### **Operator Action**

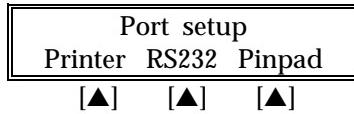

Hold down the [ALPHA] key and press [7] [1] [3] [9]. Release the [ALPHA] key to enter the boot mode.

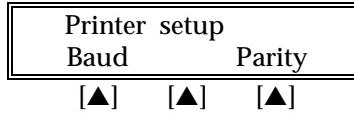

Press the right [▲] key to select SETUP.

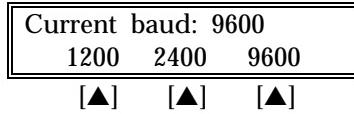

Press the left [▲] key to select PORTS.

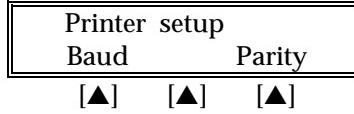

Press the left [▲] key to select PRINTER.

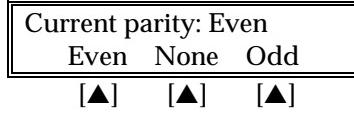

Press the left [▲] key to select BAUD to change the printer baud rate.

Select the correct baud rate. Press the [▲] key below your choice to select it and press [CLEAR].

Press the right [▲] key to select PARITY.

Select the correct parity. Press the [▲] key below your choice to select it and press [CLEAR] five times to reboot the terminal.

## **BOOT MODE FUNCTIONS**

---

### **RS232 Port Setup**

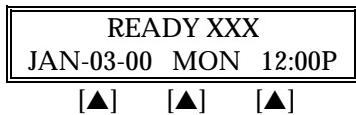

To change the RS232 port factory defaults follow the steps outlined below. The default settings are designed to be used for direct RS232 and Master-Slave (POS-to-POS) downloads. Standard Default: Baud= 19200, Parity= None. **There is usually no need to change these settings.**

<b>Display Message</b>	<b>Operator Action</b>
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: auto;"><p>READY XXX JAN-03-00 MON 12:00P</p><p>[▲] [▲] [▲]</p></div>	Hold down the [ALPHA] key and press [7] [1] [3] [9]. Release the [ALPHA] key to enter the boot mode.
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: auto;"><p>CLEAR to resume Time Load Setup</p><p>[▲] [▲] [▲]</p></div>	Press the right [▲] key to select SETUP.

Press the [#] key to see other options. Press the [▲] key below your choice to select it and press [CLEAR].
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: auto;"><p>RS232 setup Baud Parity</p><p>[▲] [▲] [▲]</p></div>	Press the right [▲] key to select PARITY.
<div style="border: 1px solid black; padding: 5px; width: fit-content; margin: auto;"><p>Current parity: None Even None Odd</p><p>[▲] [▲] [▲]</p></div>	Select the correct parity (default is None). Press the [▲] key below your choice to select it and press [CLEAR] five times to reboot the terminal.

### **PINpad Port Setup**

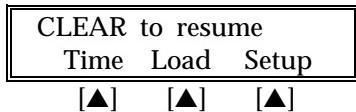

To change the PINpad port factory defaults follow the steps outlined below. The standard default settings are: Baud= 1200, Parity= Even. **There is usually no need to change these settings.**

#### **Display Message**

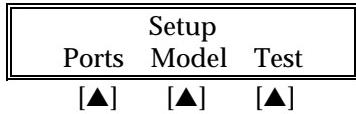

#### **Operator Action**

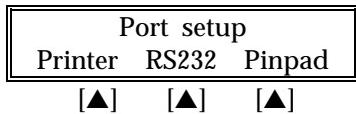

Hold down the [ALPHA] key and press [7] [1] [3] [9]. Release the [ALPHA] key to enter the boot mode.

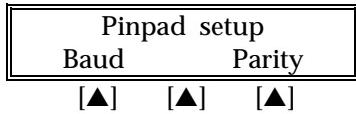

Press the right [▲] key to select SETUP.

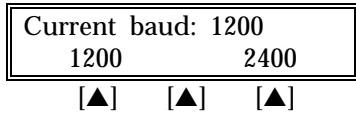

Press the left [▲] key to select PORTS.

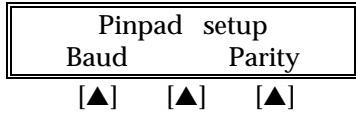

Press the right [▲] key to select PINPAD.

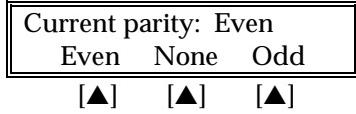

Press the left [▲] key to select BAUD.

Select the correct baud rate (default is 1200). Press the [▲] key below your choice to select it and press [CLEAR].

Press the right [▲] key to select PARITY.

Select the correct parity (default is Even). Press the [▲] key below your choice to select it and press [CLEAR] five times to reboot the terminal.

## **BOOT MODE FUNCTIONS**

---

### **Model Number**

Follow the procedures outlined below to find out the terminal model (version) of the ROM and RAM.

<b>Display Message</b>	<b>Operator Action</b>
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>READY XXX JAN-03-00 MON 12:00P</p><p>[▲] [▲] [▲]</p></div>	Hold down the [ALPHA] key and press [7] [1] [3] [9]. Release the [ALPHA] key to enter the boot mode.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>CLEAR to resume Time Load Setup</p><p>[▲] [▲] [▲]</p></div>	Press the right [▲] key to select SETUP.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>Setup Ports Model Test</p><p>[▲] [▲] [▲]</p></div>	Press the middle [▲] key to select MODEL.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>Model 256k ROM &lt;ver&gt; RAM</p><p>[▲] [▲] [▲]</p></div>	Press the left [▲] key to select ROM.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>ROM Version: OS 3.0</p><p>[▲] [▲] [▲]</p></div>	Terminal displays ROM version. Press [CLEAR].
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>Model 256k ROM &lt;ver&gt; RAM</p><p>[▲] [▲] [▲]</p></div>	Press the left [▲] key to select RAM.
<div style="border: 1px solid black; padding: 5px; width: fit-content;"><p>RAM Version: V00.00B</p><p>[▲] [▲] [▲]</p></div>	Terminal displays the application (in RAM) version. Press [CLEAR] four times to reboot the terminal.

### **Clear Memory**

This irreversible function erases the terminal's memory (RAM) and should only be accessed with the assistance of a qualified service representative. Follow the procedures outlined below to erase the terminal's RAM.

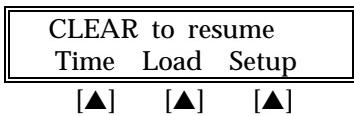

**WARNING:** After erasing the RAM, a full download must be performed to restore the application to the terminal's memory.

#### **Display Message**

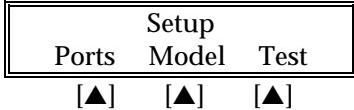

#### **Operator Action**

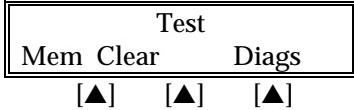

Hold down the [ALPHA] key and press [7] [1] [3] [9]. Release the [ALPHA] key to enter the boot mode.

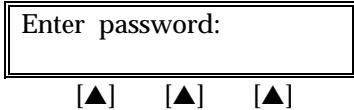

Press the right [▲] key to select SETUP.

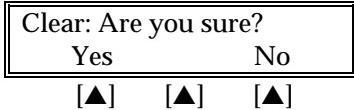

Press the right [▲] key to select TEST.

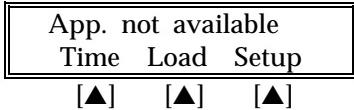

Press the left [▲] key to select MEM CLEAR.

Key in the default password of [4] [6] [5] [1] [0] [7] [0] or the password assigned by the bank/ISO or FDMS Help Desk and press [ENTER].

Press the left [▲] key to select YES and confirm memory clear.

The memory was successfully cleared.

## ***TERMINAL DIAGNOSTICS***

---

### **TERMINAL DIAGNOSTICS**

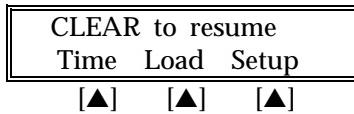

The LinkPoint 3000 diagnostics option tests the different hardware components of the terminal. Follow the procedures outlined below to initiate the diagnostics menu. Diagnostics are intended for use primarily by repair depots, technicians, and for POS support service centers.

#### **Display Message**

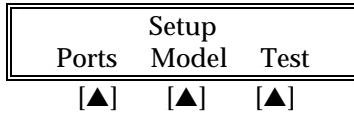

#### **Operator Action**

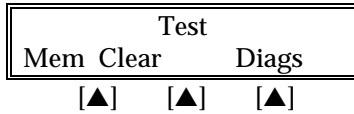

Hold down the [ALPHA] key and press [7] [1] [3] [9]. Release the [ALPHA] key to enter the boot mode.

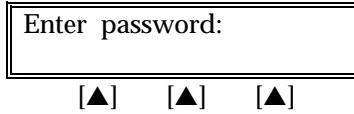

Press the right [▲] key to select SETUP.

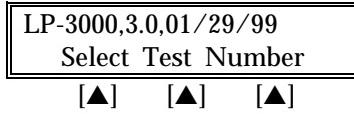

Press the right [▲] key to select TEST.

Press the right [▲] key to select DIAGS.

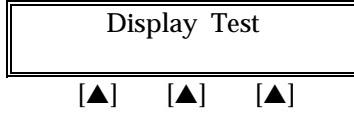

Key in the default password of [4] [6] [5] [1] [0] [7] [0] or the password assigned by the bank/ISO or FDMS Help Desk and press [ENTER].

At this point, the LinkPoint 3000 terminal prompts the user to choose from the ten tests it can perform. To select a test simply press the appropriate number key.

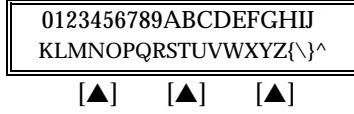

#### **Display Test —Press [1]**

#### **Display Message**

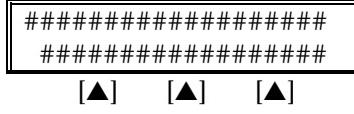

#### **Operator Action**

Please wait...

Please wait...

At this point this you can press [ENTER] to continue the diagnostics testing or press [CLEAR] to exit the testing.

### ***Keyboard Test — Press [2]***

### **DOWNLOAD PROCEDURES**

There are three methods of downloading the application into the LinkPoint 3000: 1) remotely via telephone, 2) PC-to-POS, and 3) POS-to-POS. Unless an application has been pre-downloaded, the terminal will initially display the message APP. NOT AVAILABLE. If a full or a partial download is selected, the terminal will prompt the user to enter any missing fields (i.e., application ID) and will automatically return to the first empty field.

#### ***Telephone Download (No application loaded)***

The telephone download requires the use of a remote PC with the software necessary to accept incoming download requests (i.e., Zontalk 3000™). Follow the procedures outlined below to setup the LinkPoint 3000 terminal for a modem download. **When the terminal displays ‘APP. NOT AVAILABLE’ on line 1 of the display, a FULL download must be initiated.**

#### **Display Message**

### **POS-to-POS (Master/Slave) Download**

The POS-to-POS download transfers all application and transaction data from the master terminal to the slave terminal. Therefore, it is important to ensure the integrity of the master device. This includes ensuring that: (a) there are no transactions in the master, (b) all parameters are set to the default settings, (c) the date/time and hardware settings are correct. To perform a POS-to-POS download connect one end of a standard VeriFone 8-pin DIN back-to-back download cable (p/n 00490-00 REV C) to the master terminal's RS232 port and the opposite end to the RS232 port of the slave terminal. The master terminal must be fitted with an EPROM (OS) version of 1.4 or higher to perform this type of download. Follow the steps below to setup the master and slave terminals for a POS-to-POS download.

## **DOWNLOAD PARAMETERS**

---

### **DOWNLOAD PARAMETERS**

Download parameters are used for programming or updating a terminal's profile. These parameters may be added or modified through the standard Zontalk Edit Procedures. As mentioned in the previous section, downloads may be performed by three methods: modem-to-terminal in the field, computer-to-terminal, or terminal-to-terminal via the RS232C serial port. The following list contains the available parameters (sometimes referred to as memory locations) for the LFRET43 Retail application. The list is organized into four columns containing the memory location, the type of field, maximum field length, and the description of the field's contents.

#### ***Field Type Codes***

N = numeric

Q = question, Y or N

P = phone number field (0-9, A-Z, -, \*, #, semicolon, comma, and space)

X = Alphanumeric

B = Binary (0 = no, 1=yes)

#### ***Memory Locations***

Parameter	Field Type	Field Length	Description of Field
#ACLSE	Q	1	Enable auto close: Y or N
#ACTME	X	4	Auto close time HHMM (24 hour format)
#ARPT	Q	1	Auto report at Batch Close: Y or N
#BMAX	N	3	Max. # items in batch
#CBMAX	X	8	Maximum amount for Debit cash back
#CBMIN	X	8	Minimum amount for Debit cash back
#CKMID	X	11	Check Guarantee Merchant ID
#CKPNP	P	20	Check Guarantee Primary phone number
#CKPNS	P	20	Check Guarantee Secondary phone number
#CKSVC	N	1	Check Service: 0 = CSI, 1 = Equifax, 2 = Telecheck
#CLOCK	Q	1	12 hour format flag: Y or N
#CSWD	X	8	Card swipe default: SALE, AUTH or TICKET
#DCBSC	X	4	Surcharge—Debit cash back (e.g., 50 = .50¢)
#DEBCB	Q	1	Ask for cash back for Debit: Y or N
#DEVID	X	4	Device ID
#DOPT1	X	20	Custom optional field 1 prompt
#DOPT2	X	20	Custom optional field 2 prompt
#DPOSC	X	4	Surcharge—Debit purchase only (e.g., 50 = .50¢)
#DRCRE	Q	1	Disable credit on RETURNS: Y or N
#DRDEB	Q	1	Disable debit on RETURNS: Y or N
#DWKEY	X	16	Debit working key
#FLEX1	X	40	Receipt flex prompt line 1 (below signature line)
#FLEX2	X	40	Receipt flex prompt line 2 (below signature line)
#FLEX3	X	40	Receipt flex prompt line 3 (below signature line)
#H1	X	40	Header line 1
#H2	X	40	Header line 2
#H3	X	40	Header line 3
#H4	X	40	Header line 4
#H5	X	40	Header line 5

## **DOWNLOAD PARAMETERS**

---

Parameter	Field Type	Field Length	Description of Field
#H6	X	40	Header line 6
#IDLE1	X	20	Custom Idle Prompt for display line 1
#IDLE2	X	20	Custom Idle Prompt for display line 2
#IDRC	Q	1	Print Item Detail Report at Close: Y or N
#INV	Q	1	Invoice number enable flag: Y or N
#KBCLK	Q	1	Keyboard beep: Y or N
#KBOUT	N	2	Keyboard time out: 0 to 60 seconds (0 = must press CLEAR to return to the idle prompt; 1 - 60 = terminal automatically returns to the idle prompt after the set number of seconds)
#KEYED	Q	1	Disable manual entry of card: Y or N
#L4DIG	Q	1	Last four digit entry flag: Y or N
#MIDC	N	16	Merchant ID
#MKEY	N	1	Location of Master key for PINpad
#OPID	Q	1	Operator ID enable flag: Y or N
#PABX	P	12	Prefix required for dialing
#PAVS	Q	1	Enable AVS: Y or N Activates Phone order indicator, AVS prompts, and Order number prompts
#PCARD	Q	1	Enable Purchasing card option: Y or N Activates Customer Code and Tax prompts
#PCPNC	P	20	Host Primary Close phone number
#PDS	N	4	Modem speed: 300 or 1200
#PDT	X	1	Tone = T Pulse = P
#POPT1	Q	1	Enable optional field 1: Y or N
#POPT2	Q	1	Enable optional field 2: Y or N
#PP201	Q	1	PIN pad 201: Y or N

#PSWD0	X	6	Manager password
#PSWD1	X	24	Bit map for password protected transactions and functions. 1 for protect, 0 for off
#PTAX	Q	1	Sales Tax prompt (separate from Purchasing card)
#RETRY	N	3	Number of retries to call Host
#SACCT	Q	1	Show swiped account number on display: Y or N
#SCPNC	P	20	Host Secondary Close phone number
#SPNC	P	20	Host Secondary phone number
#T1	X	40	Receipt trailer line 1 (below flex lines)
#T2	X	40	Receipt trailer line 2 (below flex lines)
#TAAC	Q	1	Ask for total dollar amount at Close: Y or N
#TCMAP	B	12	Telecheck prompt options bit map 1=ON , 0=OFF (refer to the Telecheck Information segment)

## **DOWNLOAD PARAMETERS**

---

The following table contains certain Default Settings that will be automatically downloaded with the LFRET43 application. These Default Parameters may be overridden through Zontalk Edit Procedures.

Parameter	Default Setting	Comments
#ACLSE	Y	
#ACTME	0130	
#ARPT	N	
#BMAX	300	
#CBMAX	00000	
#CBMIN	0000	
#CKMID	0000000000	
#CKPNP	000000000000	
#CKPNS	000000000000	
#DEBCB	N	
#DRCRE	N	
#DRDEB	Y	Generally, Debit returns are disabled
#DWKEY	0000000000000000	
#FLEX1	I AGREE TO PAY ABOVE AMOUNT ACCORDING	
#FLEX2	TO CARD ISSUER AGREEMENT	
#FLEX3	(MERCHANT AGREEMENT IF RETURN)	
#IDRC	N	
#INV	N	
#KBCLK	Y	
#KBOUT	00	
#KEYED	N	N = Keyed transactions allowed
#L4DIG	Y	
#MIDC	022009001234566	FDC Omaha test Merchant ID
#MKEY	1	
#OPID	N	Operator ID
#PCPNC	9501324	
#PDT	T	
#PORDR	Y	
#PP201	N	
#PPNC	9501324	
#PREPR	Y	
#PRLF	7	
#PRREC	Y	
#PSWD0	123123	
#PSWD1	0000000010010000	Refer to page 33 for bit map details
#RETRY	5	
#SACCT	N	
#SCPNC	18002289074	
#SPNC	18002289074	
#TAAC	N	
#TCMAP	111000100000	Refer to the Telecheck section

### ***Password Protect Settings***

The password keyword (field name) for Manager's Password is #PSWRD0. The field name #PSWRD1 is used to enable a password prompt for the transactions and functions as noted in the table below.

#PSWRD1: 0000000000000000 (Where 0=NO & 1=YES) The 17 positions correspond to the following 17 transactions or functions:

Position	Password Protects
1	Sale
2	ATM/Debit
3	Check
4	Void
5	Return
6	Review
7	Close (except on Auto Settle)
8	Auth Only
9	Ticket Only/Offline
10	Manual Clear Batch
11	POS to POS Transfer
12	Technical Specification Printout
13	Demonstration Mode ON/OFF
14	Printer ON/OFF
15	Dial Prefix Entry
16	Dial Suffix Entry
17	View Merchant Information

### ***Telecheck Check Service***

The following Zontalk parameters (memory locations) are used when establishing Telecheck using the LinkPoint 3000 LFRET43 Retail/AVS application:

- #CKSVC- Check Service type: Telecheck is “2”
- #CKPNP- Check Guarantee Primary Phone number: Default is 950-5666
- #CKPNS- Check Guarantee Secondary Phone number: Default is 1-800-366-8950
- #CKMID- Check Guarantee Merchant ID: No default
- #TCMAP- Telecheck prompt options (SEE BELOW)

### ***Telecheck Check Service Prompt Options***

#TCMAP: 111000100000 (Where 0=NO & 1=YES) The 12 positions correspond to the following 12 Telecheck prompts and are activated when the #CKSVC field is filled with “2 (Telecheck Service):”

## **DOWNLOAD PARAMETERS**

---

Position	Prompt
1	Amount of Sale
2	Driver's License #
3	State Code
4	Micr #
5	Check #
6	Check type
7	Date of Birth
8	Driver's License Expiration Date
9	Driver's License Zip Code
10	Cashback Amount
11	Home Phone #
12	Business Phone #

A standard part of the Zontalk download files that LinkPoint International provides to any client will include a "TELECHECK" terminal record in the Edit Terminal pick list. The Zontalk user/administrator can then invoke the USES utility to add all TELECHECK-related information, with the exception of the Merchant ID.

### ***Equifax Check Service Information***

The following Zontalk parameters (memory locations) are used when establishing the Equifax check service using the LinkPoint 3000 LFRET43 Restaurant application:

- #CKSVC- Check Service type: Equifax is "1"
- #CKPNP- Check Guarantee Primary Phone number: Default is 1-800-628-5637
- #CKPNS- Check Guarantee Secondary Phone number: Default is 1-800-237-2626
- #CKMID- Check Guarantee Merchant ID: No default— as supplied by Equifax

A standard part of the Zontalk download files that LinkPoint International provides to any client will include a "EQUIFAX" terminal record in the Edit Terminal pick list. The Zontalk user/administrator can then invoke the USES utility to add all EQUIFAX-related information, with the exception of the Merchant ID.

**DIAL STRING CODES SPECIFIC TO LP3000**

The following table contains a list of codes and their uses for special telephone dialing circumstances. These can be keyed directly into the locations reserved for entering telephone numbers.

<b>CODE</b>	<b>DESCRIPTION</b>	<b>ENTRY POSITION</b>
-	Hypen: One (1) second pause	Where the pause is required
,	Comma: Two (2) second pause	Where the pause is required
Y	Additional dial tone required	Where the dial tone is required
L	Location in dial string to open the dial tone listen window	The point at which the terminal needs to check for tone
M	Indicates the presence of multiple terminals using same phone; must be in dial string of each terminal	Anywhere in dial string
P	Used only when the 'M' code is supplied and there is a dial prefix. When this code is present, the "listening" of sound energy between tone digits is suppressed until the position of the 'P' code is reached. This code is used in the multi-terminal same-line setup where a second dial tone is produced after a dial prefix. If the 'P' code is not used, then the second dial tone will cause supply enough energy which may appear as if a different terminal is dialing.	Where the "listening" is to be enabled
S	A '.2' second pause	Where the pause is required
T	Listens for energy between dialing each digit. This is only used with the 'M' code.	Anywhere in dial string
U	If this character is NOT supplied anywhere in the dial string, then a LINE STATUS TEST of 'line busy' will cause a return code of '6' to the application, and a "no-dial-tone" condition will return a '7' to the application. If the 'U' code is supplied in the dial string, then both "line busy" and "no-dial-tone" conditions will return a '6' to the application, and '7' will never be returned to the application.	Anywhere in dial string
V	Suppresses LINE STATUS TEST	Anywhere in dial string
W	Skips dial tone requirement	Anywhere in dial string
X	Slow dial speed: 100 milliseconds on/off	Anywhere in dial string

## **BASIC OPERATION**

---

### **BASIC OPERATION**

#### ***Transaction Keys***

The LinkPoint 3000 has ten (10) transaction keys. Seven of these keys are located directly below the terminal display and are labeled [VOID], [SALE], [ATM/DEBIT], [CHECK], [REVIEW], [CLOSE], and [RETURN]. The other three transaction keys are located to the right of the numbered keys, the [+] (REPRINT/PRINT) key, [X] (AUTH ONLY) key, and the [-] (TKT ONLY/OFFLINE) key. These ten keys are used to perform the various dedicated standard retail transactions. Transactions can be initiated any time the terminal is in the idle state (i.e., displays the READY message).

1. Check the display for the READY message. If it is not displayed, press [CLEAR] to cancel the current operation and display the READY message.
2. Press the desired transaction key to begin the transaction.
3. Follow the instructions given by the prompts on the display panel to complete the transaction.
4. Press [CLEAR] to return to the READY message when the transaction is completed (the terminal is programmed to return to idle in one minute).

#### ***Using the Cardreader***

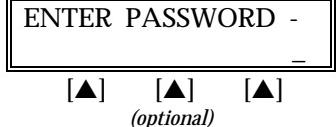

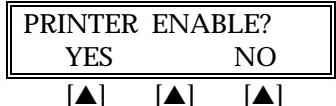

1. Check the display for the READY message. If it is not displayed, wait until the current operation has ended and then press [CLEAR] to return to the READY message.
2. Initiate the correct transaction type (i.e., press [SALE] to initiate a sale).
3. Insert the credit or debit card into the rear of the cardreader slot with the magnetic stripe facing down and away from the keypad (see Figure 9 on page 5).
4. Slide the card through the slot without stopping. If the terminal beeps, check the position of the magnetic stripe and slide the card through the slot again. If the beep persists, the card may be damaged. Type the account number directly on the keypad.
5. Complete the transaction by following the display messages.

#### ***The Calculator***

The LinkPoint 3000 includes a built-in calculator capable of performing simple arithmetic calculations. To access the calculator, from the idle prompt (READY message) press the desired numeral and associated math symbols and press [ENTER] to obtain the result. For example, to calculate the result of the sum of two plus two, press [2] [+] [2] [ENTER] and the terminal will display the sum, in this case "4." For a decimal point, please press the [\*] key.

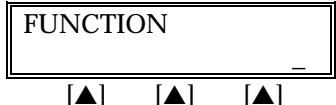

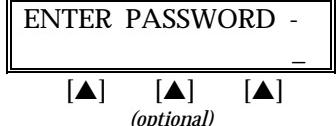

**LOCAL FUNCTIONS*****Printer Enable/Disable***

To enable or disable the printer follow the instructions outlined below.

<b>Display Message</b>	<b>Operator Action</b>
	Press [ENTER].
	Key in [4] [1] and press [ENTER].
	If prompted, key in the password (the default is 123123) and press [ENTER].
	Press the left [▲] key to enable the printer or press the right [▲] key to disable the printer.
	Terminal returns to the idle prompt.

***Dial Prefix (PABX)***

To enter, view, or change the current PABX Dial Prefix that the terminal dials before connecting with the host.

<b>Display Message</b>	<b>Operator Action</b>
	Press [ENTER].
	Key in [4] [2] and press [ENTER].
	If prompted, key in the password (the default is 123123) and press [ENTER].

#### **Operator Action**

Press [ENTER].

Key in [4] [0] and press [ENTER].

Press [CLEAR] after reviewing this information.

**STANDARD KEY OPERATIONS**

Retail transactions are transactions that all personnel can perform. These transactions include Sale, Debit Sale, Return, Void, Ticket Only/Offline, Authorization Only, and Close Batch. Standard Retail Credit and Debit card, Direct Marketing, and Purchasing Card program are supported.

The LinkPoint 3000 READY message estimates the number of transactions that can be performed before the batch is full. For example, READY 30 indicates there is space to store approximately 30 more transactions in the current batch. Overflowing the terminal with transactions can compromise data integrity.

When the memory is full, the screen displays “BATCH FULL-PLS CLOSE” and no further transactions can be stored until the batch is closed and the memory is cleared from the terminal. This is a safety feature that advises the merchant to close the batch when the batch is almost full.

The procedures for each transaction type include most optional prompts. These options are designated with the note “*(optional)*” directly below the displayed message. Depending on the user’s needs, the features might either be enabled or disabled.

Key Name	Explanation
[SALE]	Obtains credit card authorization and captures the transaction for later deposit.
[ATM/DEBIT]	Obtains ATM/Debit card authorization and captures the transaction for later deposit.
[RETURN]	Initiates a return/credit.
[X] (AUTH ONLY)	Used to authorize a transaction without ticket capture.
[–] (TKT ONLY/OFFLINE)	Captures a previously authorized transaction.
[VOID]	Voids any captured transaction in an open batch.
[REVIEW]	Used to review or print information about captured transaction details and/or totals prior to batch close.
[–] (REPRINT/PRINT)	Prints a duplicate copy of a captured transaction.
[CLOSE]	Closes the terminal batch and initiates the deposit of funds.

## **STANDARD KEY OPERATIONS**

---

### **SALE**

A sale is a monetary transaction that transfers funds from a cardholder's credit line to the merchant's bank account. This transaction is the normal procedure used to authorize and capture a credit card sale for deposit.

#### ***Retail Credit Card Sale — Swipe***

**ATM / DEBIT CARD RETURN**

An ATM/Debit Return is a monetary function that transfers funds from the merchant's bank account to the cardholder's account. A PINpad and a printer are required to process an ATM/Debit card. THIS TRANSACTION IS DISABLED AS THE DEFAULT, DUE TO RESTRICTIONS PLACED BY MANY REGIONAL POS DEBIT NETWORKS.

***Swipe Only (Manual entry of Debit cards is not allowed.)***

### **AUTHORIZATION ONLY**

An Authorization Only is a nonmonetary function that checks the availability of the cardholder's credit and reserves the authorized amount without actually charging the cardholder. Follow the steps below to authorize a transaction without ticket data capture. After obtaining an authorization only, a TICKET ONLY/OFFLINE transaction must be performed in order to capture and deposit the transaction.

#### ***Authorization Only — Card Swipe***

## **STANDARD KEY OPERATIONS**

---

### **CLOSE BATCH**

The Close Batch procedure is a monetary transaction used to summarize daily transactions for electronic deposit into the merchant's bank account. Follow the steps below to summarize transactions for electronic deposit.

<b>Display Message</b>	<b>Operator Action</b>
<div style="border: 1px solid black; padding: 5px; text-align: center;"><p>READY XXX JAN-03-00 MON 12:00P</p><p>[▲] [▲] [▲]</p></div>	Press the key labeled [CLOSE].
<div style="border: 1px solid black; padding: 5px; text-align: center;"><p>ENTER PASSWORD -</p><p>[▲] [▲] [▲] <i>(optional)</i></p></div>	If prompted, key in the password (the default is 123123) and press [ENTER].  (This prompt is optional.)
<div style="border: 1px solid black; padding: 5px; text-align: center;"><p>PRINT REPORT? YES NO</p><p>[▲] [▲] [▲] <i>(optional)</i></p></div>	Press the left [▲] key to print a report or the right [▲] key to skip this step.
<div style="border: 1px solid black; padding: 5px; text-align: center;"><p>ENTER TOTAL AMOUNT</p><p>\$0.00</p><p>[▲] [▲] [▲] <i>(optional)</i></p></div>	Key in the total batch amount and press [ENTER].
<p><i>Terminal displays several messages</i></p> <div style="border: 1px solid black; padding: 5px; text-align: center;"><p>CLOSE 000000.00</p><p>—</p><p>[▲] [▲] [▲]</p></div>	Please wait—the terminal is communicating with the host computer.  After printing stops, press [CLEAR] to return to the READY message.

The completed Batch receipt will look like this:

BATCH CLOSED	
MERCH ID: XXXXXXXXXXXXXXXX	-Merchant ID
TERMINAL ID: XXXX	-Terminal ID
DATE 01/03/00 TIME 11:00P	-Date and time of close
# ITEMS: XXX	-Total number of items in batch
RESP: CLOSE 00000.00	-Response from host, total dollar amount of transactions in batch

**APPENDIX A—PROMPTS**

This appendix explains the meaning of the different terminal prompts.

<b>ALREADY VOIDED</b>	The selected item in the batch was already voided.
<b>APPROVAL CODE</b>	This message prompts for the entry of the authorization code during a Ticket Only transaction.
<b>BATCH SUMMARY</b>	Displays during the printing of a report which includes: individual bankcard transactions and totals, credit card transactions and totals and ATM/Debit card totals.
<b>BATCH FULL-PLS CLOSE</b>	This message displays just before the terminal buffer is completely full to prevent the terminal from locking up; instructs the user to close the batch before being able to continue.
<b>CALL CENTER</b>	Contact the voice authorization center and request a verbal approval.
<b>CASHBACK?</b>	This message prompts after AMOUNT OF SALE during an ATM/Debit sale.
<b>CASHBACK AMOUNT?</b>	This message prompts after YES is selected at the CASH BACK? prompt.
<b>CLEAR TO RESUME</b>	This is the main menu display in the boot mode.
<b>COMM FAILURE</b>	(1) Displays when the terminal attempts to dial out after the maximum number of allowable times (customizable). (2) Displays when no telephone line is detected.
<b>CONNECT ERROR</b>	The terminal has detected an error while connecting to the host computer. Please try the transaction again.
<b>CONNECTED!</b>	This message displays when the terminal connects to the host computer.
<b>CUSTOMER CANCELED</b>	The cardholder pressed [CLEAR] on the PINpad and canceled the transaction.
<b>DECLINED</b>	The card has been declined by the host computer.
<b>DEMONSTRATION ONLY! NOT AN ACTUAL SALE</b>	Prompts at the beginning of each demo transaction.
<b>DIALING...</b>	This message is displayed when the terminal begins dial out.
<b>ENTER APPL. ID</b>	This message prompts during the download request.

## **APPENDIX A—PROMPTS**

---

<b>ENTER LAST 4 DIGITS</b>	Card fraud protection prompt displayed after a card is swiped.
<b>ENTER PASSWORD</b>	This message prompts when a password is required to access a function or transaction.
<b>ENTER PHONE NUMBER</b>	This message prompts during the download request.
<b>ENTER TERMINAL ID</b>	This message prompts during the download request.
<b>ERROR!...NO MATCH</b>	The 4 digits entered do not match the last 4 digits encoded on the magnetic stripe of the card. Attempt to re-enter the last 4 digits. If there is no match again, the terminal will return to the READY message.
<b>EXPIRED CARD</b>	The expiration date sent with the authorization request indicates that the card has expired. If the card is not expired, the terminal may be programmed with the incorrect date.
<b>EXPIRY DATE? (MMYY)</b>	This message prompts after the keyed entry of the cardholder's account number.
<b>IMPRINT REQUIRED IF CARD IS PRESENT</b>	This message prompts for approximately four seconds after the card number and the expiration date are keyed.
<b>INCORRECT AMOUNT</b>	The terminal allows a maximum amount entry of nine positions including the decimal point (\$123456.78) or a minimum amount entry of \$.01. The amount entered does not fall within these parameters.
<b>INVALID AMOUNT</b>	This message displays when a zero amount is entered for credit card transactions or when an amount less than \$1.00 is entered for a Check Guarantee request.
<b>INVALID CARD NUMBER</b>	The cardholder's account information transmitted to the host computer is not valid (i.e., sending incorrect magnetic stripe data).
<b>INVALID EXP DATE</b>	The expiration date entered was formatted incorrectly. The correct date format is MMYY (i.e., for January 1999, 0199 should be entered).
<b>INVALID PIN</b>	The transaction was DECLINED because the customer entered an incorrect PIN.
<b>INVALID SERVICE</b>	Optional service is not enabled.
<b>INVALID TERM ID</b>	The terminal has been programmed incorrectly.
<b>INVALID TRAN TYPE</b>	The terminal may not be programmed to accept this transaction (i.e., terminal may not be setup to accept this card type).

## **APPENDIX A—PROMPTS**

---

<b>INVALID ZIP CODE</b>	The zip code was entered incorrectly. The correct format is a 5- or 9- digit zip code.
<b>ITEM NOT FOUND!</b>	The terminal could not locate the particular item number selected. Try a different item number.
<b>KEY NOT ACTIVE</b>	This message displays when an unavailable key is pressed.
<b>LINE ERROR</b>	There may be a communication problem between the terminal and the host computer.
<b>MOD-10 CHECK</b>	The account number of the swiped/keyed card is invalid.
<b>MODEM ERROR</b>	The terminal has detected a problem with its modem. Try the transaction again.
<b>MUST FIRST RECV AUTH</b>	This message prompts for approximately three seconds each time the [OFFLINE] key is pressed.
<b>MUST PERFORM FULL DOWNLOAD FIRST</b>	This message prompts when a partial download is requested but the application is not yet loaded into the terminal.
<b>NO CARRIER</b>	This message displays when a modem/RS232 error occurs.
<b>NO DIAL TONE</b>	This message displays when the phone line is not detected.
<b>NO GUAR/OVER LIMIT</b>	Too many checks or large checks have been authorized and put the merchant over a pre-established check approval limit.
<b>NO LINE</b>	The terminal cannot detect a telephone line connection. Make sure that the telephone cord is securely plugged into the terminal.
<b>NO PIN PAD</b>	A PINpad is not connected to the terminal or it is not activated. An ATM/Debit sale cannot be performed without a PINpad.
<b>NO PHONE NUMBER</b>	The message displays when the primary host and/or the secondary host phone number(s) were not downloaded into the terminal.
<b>NO TOTALS FOUND!</b>	No transactions were found for the card type selected.
<b>NOT FOUND!...</b>	The terminal displays this message when it cannot find the information requested (i.e., there is no item number 99 in the current batch).
<b>PICK UP CARD</b>	The host computer has detected that the card used is no longer valid or it may be lost or stolen.
<b>PLEASE ATTEMPT TO CLOSE BATCH LATER!</b>	The terminal may be having problems closing the batch at this particular time. Please attempt to close the batch later.

## **APPENDIX A—PROMPTS**

---

<b>PREV    NEXT    NEW</b>	This message displays on line 2 during a VOID request.
<b>PRINTER DISABLED! CHECK PRINTER!</b>	User may not have a printer or it may not be installed properly. Check that the printer is securely connected to the back of the terminal, that the power is turned on, and that it is enabled via the terminal setup.
<b>PRINTER REQUIRED FOR DEBIT CARD SALES</b>	This message prompts when the [ATM/DEBIT] key is pressed but a printer is not connected/enabled. A printer must be connected, enabled, and powered on to perform an ATM/Debit sale.
<b>PROMPTS FILE</b>	Displays during initialization of the terminal after a full or a partial download.
<b>READY XXX</b>	The line 1 default idle prompt displays the number of transactions left in the batch.
<b>RECEIVING...</b>	This message displays when the terminal is receiving a response from the host computer via modem.
<b>SWIPE ONLY</b>	(1) User attempted to key in an ATM/Debit sale. ATM/Debit sales must be swiped. (2) User attempted to key in a transaction when the terminal is downloaded with the KEYED parameter disabled.
<b>SWIPE CARD AGAIN NOW</b>	The card was swiped incorrectly or another card error condition exists.
<b>TO SELECT PUSH ENTER</b>	Alternate display with the PREV NEXT NEW message.
<b>TRANSMITTING...</b>	This message displays when the terminal is sending transaction data to host via modem.
<b>TRY AGAIN</b>	The card may have been improperly swiped through the cardreader--attempt to swipe the card again.
<b>UNDEFINED CARD TYPE</b>	The card number does not match the required account range settings. If the account number is valid, the terminal is not properly setup to accept that particular card type.
<b>UNREADABLE CARD</b>	The magnetic stripe of the swiped card may be damaged or the cardreader may be obstructed or otherwise requires cleaning.
<b>VOID    VIEW</b>	This message displays on line 2 when an item is selected to be voided.
<b>WAITING FOR ANSWER</b>	This message displays when the terminal is waiting to connect to the host computer or when the phone number programmed is incorrect and cannot connect to the host.

## ***APPENDIX A—PROMPTS***

---

### **WAITING FOR PIN**

Prompts on the PINpad while it waits for the customer to enter his/her PIN number.

## **APPENDIX B—TROUBLESHOOTING GUIDELINES**

---

### **APPENDIX B—TROUBLESHOOTING GUIDELINES**

This appendix identifies some problems that may be encountered and the actions necessary to correct them.

#### **DISPLAY PANEL MALFUNCTION**

If the LinkPoint 3000 displays incorrect information, such as an unreadable message or nothing at all, it may have a power problem or be a defective terminal. The terminal application may not have been properly loaded.

#### **KEYPAD MALFUNCTION**

Check the display panel. If it displays the wrong characters or nothing at all, refer to the section “Display Panel Malfunction” above. Press several keys; a “beep” should be heard each time. If the “beep” works, make sure the correct data is being entered.

#### **PRINTER MALFUNCTION**

Check that the printer paper is properly loaded in the printer. The printer will not operate unless a roll of paper is correctly installed. Check the terminal for signs of power failure. Press the [CLEAR] key and try the operation again; an improper command may have been used.

**GLOSSARY**

<b>12 Hour Clock</b>	Downloaded feature which allows the display of time in 12 or 24 hour format.
<b>AC</b>	Alternating Current is used as a primary source of power by AC adapters and power supplies.
<b>AC Adapter</b>	A device that converts AC electrical current to a different DC current so that it can be used by a particular device.
<b>Account Number</b>	(1) A unique series or group of digits used to numerically identify each cardholder. (2) The unique identification number assigned to the account of a specific party, within a given institution.
<b>Alphanumeric</b>	Capable of using both alphabetic and numeric characters, as in a display panel, keypad, or a computer keypad.
<b>Application</b>	A software program designed with special codes, stored in the memory for a specific purpose or customer.
<b>ATM/Debit</b>	A monetary function that transfers funds from the cardholder's ATM/Debit account.
<b>Authorization</b>	The process used by card issuers to approve or decline a transaction request.
<b>Authorization Only</b>	A nonmonetary function that verifies the availability of the cardholder's credit and reserves the authorized amount.
<b>Baud</b>	Signaling speed equal to the number of signal events per second.
<b>Cardreader</b>	The slot on the terminal that automatically reads the magnetic stripe or bar code on the back of an encoded card (bankcard or credit card).
<b>Carrier</b>	A frequency signal or tone sent over the telephone or communication line and modulated by the modem to transmit/receive data.
<b>Cashback Minimum</b>	Downloaded feature to establish the minimum amount of cash back allowed by the.
<b>Cashback Maximum</b>	Downloaded feature to establish the maximum amount of cash back allowed by the merchant.
<b>Close (host response)</b>	The batch was successfully closed and the transactions sent to the host computer.

## **GLOSSARY**

---

<b>Close Batch</b>	A monetary transaction used to summarize the day's transactions for electronic deposit to the Merchant's bank account.
<b>CPU</b>	Central Processing Unit. The brain of the computer or terminal that controls either directly or indirectly every function and device associated with the computer/terminal.
<b>Customer ID Number</b>	A number used by merchants to identify themselves to the host computer at their bank or financial institution.
<b>Data</b>	Information prepared in a particular format for use by the terminal or host computer for a specific transaction or operation.
<b>Display</b>	The small screen on the terminal that displays messages to guide users through different operations and to alert users when errors or problems occur.
<b>EPROM</b>	Erasable Programmable Read-Only Memory. A type of memory chip permanently stored in the terminal. Contains the standard application, operating system, and fixed prompts.
<b>File</b>	A collection of related data.
<b>Force (host response)</b>	There was a discrepancy between the transactions sent to the host and the transactions stored in the host computer. The terminal forced closure, the batch was successfully closed, and the transactions sent to the host computer.
<b>Fraud Control</b>	Measures taken to prevent unauthorized use of a credit or debit card.
<b>Host Computer</b>	A computer used to process credit card and debit card transactions.
<b>Invalid (host response)</b>	One or more credit card numbers sent to the host computer were invalid. The terminal forced closure, the batch was successfully closed, and the information sent to the host computer.
<b>Keypad</b>	The key panel used for entering data and performing operations.
<b>Telephone Line Cord</b>	A type of cord with modular plugs for connecting a device to another device or outlet.
<b>Manual Transaction</b>	Transaction using account information entered from the keypad rather than automatic reading devices such as the cardreader.

<b>PIN</b>	Personal Identification Number. A four to sixteen digit confidential code or electronic signature used by the Cardholder to identify themselves to the host computer as the proper user of a credit or debit card.
<b>PINpad</b>	A Personal Identification Number pad is an encrypted input device used for entering a private identification code that validates a transaction.
<b>Reprint</b>	A nonmonetary transaction used to print a duplicate copy of a captured transaction before the batch is closed.
<b>Return</b>	A monetary transaction used to reverse a previous day's transaction. This transaction credits the cardholder's account.
<b>Review</b>	A nonmonetary function used to review and print individual items and batch totals as an aid in reconciling a given day's transactions.
<b>Sale</b>	A monetary transaction that initiates the transfer of funds. A Sale can be transacted either by card swipe (magnetic cardreader) or by manual entry of the information.
<b>Scroll</b>	To move text across a display screen.
<b>Serial Port</b>	A connector used to communicate with host computers, other terminals, and printers.
<b>Swipe</b>	The action of sliding a card through a terminal's cardreader.
<b>Terminal</b>	A device used to perform transactions. The transactions are processed by the terminal itself or by a host computer. These devices have a display panel, keypad, and cardreader, and are used to enter transaction information.
<b>Ticket Only</b>	A.K.A. OFFLINE, Force or Post Auth. A monetary transaction used to initiate a deposit in two situations: (1) following an Authorization Only transaction, and (2) to complete a transaction initiated by voice authorization.
<b>Track 1 Data</b>	The information stored on track 1 of the card's magnetic stripe includes the cardholder's name, account number, expiration date, and security data.
<b>Track 2 Data</b>	American Bankers Association information stored on track 2 of the card's magnetic stripe. Includes the cardholder's account number, expiration date and security data.
<b>Void</b>	A monetary transaction used to eliminate a prior "current batch" sale. A receipt is generated to be included with that day's drafts and tickets.
